

Senior Privacy Compliance Consultant

TransTechSol – Annapolis Junction, MD

TRANSTECHSOL

TransTechSol was founded upon a culture that values transparency, alignment, expertise, decisiveness, and accountability. We pride ourselves on gaining, maintaining, and growing our talent to deliver forward-thinking solutions that lead to the next generation of technology, policy, and ultimately signals intelligence capabilities. We are considered a leader in compliance in the cryptologic community by both our clients and competitors.

Our Privacy Compliance Consultant advises clients on how to build compliance into their technical operations in order to enable more precise application of compliance concepts. They work with clients to convert legal knowledge and analysis into software and systems engineering terms, while supporting the goal of developing mission-oriented solutions.

Senior Privacy Compliance Consultant

TransTechSol seeks a Senior Privacy Compliance Consultant with the following preferred skills:

- An extensive knowledge of the U.S. government's privacy laws, regulations and policies, especially as they apply to the Department of Defense and the Intelligence Community (IC).
- A basic understanding of the different roles and authorities of the IC elements and the National Security Agency specifically.
- The ability to:
 - extract key excerpts from law and policy that are applicable to specific computer platforms and integrated systems;
 - convert legal and policy requirements into software and systems engineering terms, enabling more precise application of compliance standards to data management;
 - assist developers and their customers in understanding existing and emerging legal, compliance and policy rulings that could or should impact implementation choices;
 - recognize when additional legal and policy guidance or authorization is needed;
 - prepare written incident reports and requests for legal/policy review or guidance that succinctly capture compliance-relevant technical implementation facts;
 - interface with legal, policy and compliance personnel on customer's behalf;
 - contribute to the development of sections of systems engineering documentation such as System Engineering Plans, Initial Capabilities Documents, Requirements Specifications, and Interface Control Documents;
 - plan the verification efforts of new and unproven designs early in the development life cycle to ensure compliance with established requirements.

Required Qualifications

- Minimum 15 years of legal, compliance or related professional background and experience.
- Bachelor's degree in a related discipline from an accredited college or university is required.

Desired Qualifications

- At least 5 years' experience working in organizations within the Intelligence Community in either a Legal, Policy, Compliance or Privacy & Civil Liberties capacity.

Location

- Annapolis Junction, MD

Security Clearance

- TS/SCI with polygraph
