

## TRANSTECHSOL (TTS) POLICY/COMPLIANCE STRATEGY

At TransTechSol, transparency, precision, and curiosity are our defining principles.

- **HIRING:** We recruit compliance, policy, and privacy experts from across the intelligence community and talent from law schools and firms, offices of general counsel, and policy offices who have demonstrated the aptitude for synthesizing large volumes of information and applying knowledge to solving real-world operations problems.
- **DEPLOYMENT:** We create two-person deployments where possible to promote continuity of support, and we look for opportunities to evolve deployments from pure policy to a policy engineer/software engineer blended team as appropriate.
- **PROFESSIONAL DEVELOPMENT:** We continuously expand upon our expertise through formal and informal training, coaching, and collaboration.
- **ENGAGEMENT:** We develop and maintain strong relationships by seeking regular interaction with (current and up-and-coming) Compliance, Operations, and Capabilities decision-makers and subject matter experts.

We put mission first and offer what we know, providing compliance focused problem-solving support on the spot and even off the clock to get the job done.
